### **DETAILED ACTION**

This Office Action is in response to Amendment received 07/12/04.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-56, 83-85, 96-106, 130-133, 136-139 are drawn to methods for processing partial text entry, classified in class 715, subclass 534.
- II. Claims 70-81, 107-109, 134-135 are drawn to methods for processing gestures entered with a pen to a touch sensitive device, classified in class 715, subclass 863.
- III. Claims 86, 140-141, are drawn to methods for rapidly entering text, classified in class 345, subclass 156.
- IV. Claims 82, 87-95, 110-129 are drawn to methods for performing a search of text in a dictionary, classified in class 715, subclass 532.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case,

Invention I has separate utility such as auto-completion of text in a word processor.

Invention II has separate utility such as input of handwriting into a Personal Digital Device (PDA).

Invention III has separate utility such as stenography.

Invention IV has separate utility such as checking the spelling of a word.

See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group IV, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
